

The Vision

The Sunningdale Parish Council Vision aims to inspire all in our community to work together for a vibrant, active and environmentally-friendly Sunningdale of which we can be proud.

Improve the appearance of the Sunningdale street scene with enhanced landscaping.

Ensure development is appropriate and sensitive to the environment.

Develop Sustainable Sunningdale [SUSS] to reduce our carbon footprint.

Engage with, listen to and facilitate opportunities to improve Sunningdale.

Promote the Parish Office as a hub of community life and leisure activities.

SUSS Sustainable Sunningdale

SUSS was launched in 2009 when we inaugurated our log boiler and solar panels on the roof to encourage others to adopt renewable energy and undertook a community action inviting people to sign up to reduce their household use of energy. In 2010 our activities are energy surveys in the primary schools so that children learn about energy use and conservation. This is linked to our Eco Circus, which aims to communicate the dangers of climate change and the power of individual action in a colourful and memorable way.

Learning for Sustainability [LfS]

In partnership with the Royal Borough programme, the Parish Council Sustainable Sunningdale is encouraging our community to take action to lower our use of fossil fuels. We believe that every little action helps and that acting together we can make a significant difference to stopping climate chaos.
